

Uniface 10 Enterprise Edition: copy&paste U9 to U10 keeps wildcards, U10 to U9 loses them

copy&paste U9 to U10 keeps wildcards, U10 to U9 loses them

Author: ulrichmerkel@web.de (ulrich-merkel)

As my experiments show, we can copy some code with wildcards in the U9-IDF and paste it into the U10 one without losing the wildcards. The other way round we will lose the wildcards because they will be recognised in U9 as ESC etc. I think it's good news for all of us who will have to develop in U10 and U9 in parallel.
