

Uniface 10 Enterprise Edition: U10F216 copy&paste from codeeditor into an editbox loses linebreaks

U10F216 copy&paste from codeeditor into an editbox loses linebreaks

Author: ulrichmerkel@web.de (ulrich-merkel)

10.2.02.02 (F216 0416_1): Copied a couple of lines from the code editor and pasted it in an editbox and a winword document. While the Winword shows the text with linebreaks, these linebreaks are missing in the editbox. To have a common reference, just use the GOLD-W to open "SQL Edit" form and paste text into field "SQL command". This hasn't happened in 9.6.04+
