

Bugs, Issues and Errors: **[SOLVED]** \$ude getReferenceList

[SOLVED] \$ude getReferenceList

Author: norbert.lauterbach@infraserv.com (Lauterbach)

Hello, how can I get the Information from \$ude getReferenceList? In the idf.asn I have : \$SYMBOL_TABLE 2 So "SELECT * FROM uxcross" results to 266761 entries. I tried : V_STRING = \$ude("getReferenceList", "symboltable.;component", \$ITEM\$, "", "") V_STRING = \$ude("getReferenceList", "symboltable.;form", \$ITEM\$, "", "") V_STRING = \$ude("getReferenceList", "symboltable.;model", \$ITEM\$, "", "") But **putmess \$procReturnContext just Returns :**

```
Context=UDE getreferencelist
```

Which is the correct Syntax for this command??? The documentation seems not to be valid!? Regards Norbert
