

Uniface 10 Enterprise Edition: how to report ucomment

how to report ucomment

Author: ulrichmerkel@web.de (ulrich-merkel)

in U10, the ucomment is a rtf-coded text rather than plain text as it was before. If I use richeditbox toolbar=no, the printout in p_mswinx is ok. But how can I extract the plain text let's say to dump a couple of documentations to an external file? AFAIK, a couple of {rtf1 ...}{rtf1 ...}{rtf1 ...} will cause problems.
