

Uniface 9: migration 8.3 to 9.4

migration 8.3 to 9.4

Author: dave.manchester@nucor.com (dmanchester)

We are on Uniface 8.3 and are considering migrating to 9.4. Our current database is Oracle 8.1.

The staff here was told by a previous consulting firm that they would not be able to successfully upgrade to version 9 of Uniface until they also upgraded Oracle as well.

I personally can not think of any reason why this might be true.

Is there any reason that would prevent Uniface 9 from working with Oracle 8?
