

# Uniface 9: U94 pratt error using ORA11 client

## U94 pratt error using ORA11 client

Author: mail@gandg.it (TheAleph)

Hi, I usually work with dbase ORA10g and client ORA10g, now testing a pc with client ORA11r2 there is an error on PRATT table; the table is created as in sql files (OPTIONS field type BLOB) the error is about this field .....expected as LONG RAW (?) so can't print. Try to create and link via asn a copy table with the field long raw but the message is 'incorrect print job model can't print' Is it an Oracle or Uniface problem ? Thanks everyone. Roberto
