

Uniface 9: **SOLVED**; character count at runtime

SOLVED; character count at runtime

Author: fearandir@gmail.com (fearandir)

Hi all Currently we are developing a SMS messaging tool. We need a "character counter" solution which count the remaining characters until reach 160. Must be at run time, while user is writing. I founded this beauty, but we are under Uniface 9.4. Some workaround? **Uniface 9.6.0.4 (Service Pack MX03) + The Edit Box widget now supports incremental searching by means of an onEdit extended trigger that can be used to respond to user input as the user enters data.** Thanks, Sergio
