

# Uniface 10 Enterprise Edition: entries in triggers force: warning: 1000 - Procs statements seen after 'end' instruction

entries in triggers force: warning: 1000 - Procs statements seen after 'end' instruction

Author: ulrichmerkel@web.de (ulrich-merkel)

when entries are defined let's say in the EXEC trigger and closed with an end statement (as good coders do), the migration will force a situation where we will get warning: 1000 - Procs statements seen after 'end' instruction Trigger <CSCR> from Form: JAVATEST\_UME [ 1] ;-[Start 'Execute']  
[ 2] #startdefine [ 3] #define \$triggerAbbr=EXEC snip [ 51]\*\*\*\*\* entry load\_test [ 52] variables  
[ 53] string v\_occlist snip [ 67] 13 end ; load\_test [ 68] 1 end warning: 1000 - Procs statements seen after 'end'  
instruction [ 69] #enddefine [ 70] ;-[End 'Execute']
