

Uniface 8: Exceptional I/O error

Exceptional I/O error

Author: satheesh.balu.m@gmail.com (Satheesh)

Hello

When I am trying to retrieve the entity (Entity B), the retrieval fails with \$status -3.

In the same local proc I could able to retrieve some other entity (Entity A) with \$status as 0, before this retrieval failure.

Can anyone give the idea to solve this issue.

Thanks and Regards
