

Uniface 10 Web Edition: Confusing readme within distro

Confusing readme within distro

Author: zdenek.socha@fullsys.cz (sochaz)

Hello, I've just downloaded Uniface 10 Web Edition... and there seems to be the same readme.htm file in both zip files (32bit and 64bit); and in the product description section is stated: Readme - Uniface 10 Web Edition Early Adopter Version - Microsoft Windows distributions

Filename	Description
swinuf100101w32.zip	Windows 32-bit native Development and Deployment. This can be installed on both 32-bit and 64-bit Windows.
swinuf100101w64.zip	Windows 64-bit native Development and Deployment.

This is a bit confusing because:

1. there are no such files
2. AFAIK there is no 64bit development

Kind regards, Zdenk Socha
